

Ladybank Material Recovery Facility

Client: Fife Council - Building Services
Form of Contract: JCT
Duration: Nov 2011 to Dec 2011
NRS Role: Main Contractor

Main Description

□ This project involved the construction framing and erection of the structural steelwork for a new build Material Recovery Facility (MRF). Works also included the Roofing and Cladding package.

Works included:

- Construction of a steel portal frame structure (60m x 40m).
- Installation of roof panels to building.
- Installation of cladding panels to building.

Works were carried out in conjunction with and concurrently with other trades associated with the project.
