

## N86 Annascaul to Gortbreagoge Road Improvement Scheme

<b>Client:</b>	Kerry County Council
<b>Form of Contract:</b>	Public Works Contract for Minor Building and Civil Engineering Works
<b>Duration:</b>	Nov 2011 to Jun 2013
<b>NRS Role:</b>	Main Civil Engineering Contractor & Principal Contractor

### Main Description

The N86 Annascaul to Gortbreagoge scheme consisted of the construction of approximately 4.2km of single carriageway roadway, with a combined cycleway/pedestrian facility on each side. The scheme primarily involved on-line widening of the existing road with a 500m section of off-line construction also necessary.

The works included :

- Construction of 4.2km of Type 3 Single Carriageway road with a combined cycleway/pedestrian facility on each side.
- Construction of 5 No. Simple Priority Junctions.
- Widening/rehabilitation of 3 No. Existing structures (2 no. watercourse crossings and 1 no. stock underpass).
- 5000 gallon sewage holding tank with gravity feed and pump takeoff.
- Various pavement works
- Replacement/widening of existing culverts and design and construction of new culverts.
- Construction of various road drainage systems.
- Demolition of 3 no. structures.
- Construction of various earthworks, various ducting and chambers.
- Construction of various fencing and safety barrier, various signage, road markings and Public Lighting.
- Landscaping
- Construction of Traffic Calming works
- Construction of kerbing and footpaths

The existing road was live for the duration of the works. Traffic

and local residents had to have access routes maintained at all times past our works. Traffic management plans were drawn up, agreed with the client and implemented on site.
